Benton Howard

Forest Insect and Disease Control.

Severe ips kill has occurred East of Silvies Valley on the Malheur. If you remember in our ips meeting last year, it was felt desirable that an attempt be made to evaluate the impact of ips on specific areas.

I would like to discuss this in considerable detail as soon as convenient.

Forest Insect and Disease Control

Reference is made to the survey of ips damage being made  
by the Burns District.

We would appreciate knowing the status of the project.
